

**AMENDMENT #3 TO RFP BC-2005-01**

This amendment to RFP BC-2005-01 has been published to address an error that was discovered on page 55: Section 11.2 of attachment C, and to add a section on data retention capability to the reporting questions in attachment C.

1. The requirement that the ADS Link software be replaced is hereby removed. Because the use of Alliance Data Systems as a processor is a mandatory requirement of this RFP, it was determined that the requirement to replace the software no longer applies. The amended section 11.2 on page 55 should now read as follows:

**11.2 Describe software available for use by agencies with existing PC based point of sale systems. Also describe plans for maintenance and support of software provided. Provide brochures and specification sheets if possible.**

2. The original RFP failed to address the length of time each vendor can provide for the retention of reporting data. Section 8 of attachment C (page 53) is now updated to include the following section:

**8.7 Describe your data retention policy in relation to reporting. With your reporting system, how far back can a merchant go to retrieve both summary and detail reporting?**
